REASONS FOR ALLOWANCE

1. Claims 1-45 are allowed. The following is an examiner's statement of reasons for allowance.
2. Regarding claim 1, the prior art fails to disclose or fairly suggest a method of dose delivery of radiation including the step of determining an optimal set of weights of beamlets using the objective function, wherein the second term is zero only when the weights of beamlets mapped so as to pass through the at least one non-target volume are zero, in combination with all of the other limitations in the claim. Claims 2-21, 39, 40, and 42-45 are allowed by virtue of their dependency.
3. Regarding claim 22, the prior art fails to disclose or fairly suggest a computer-implemented method of determining an object function to be used for mapping radiation beams to a body volume, the method including determining an optimal set of weights of beamlets using the objective function, wherein the second term is zero only when the weights of beamlets mapped so as to pass through the at least one non-target volume are zero, in combination with all of the other limitations in the claim. Claims 23-29 and 41 are allowed by virtue of their dependency.
4. Regarding claim 30, the prior art fails to disclose or fairly suggest a method of providing radiation, including determining an objective function for optimizing radiation dose delivery to a target volume, the objective function having a symmetry term for enabling symmetrical dose

delivery about an axis of the target volume, in combination with all of the other limitations in the claim. Claims 31-34 are allowed by virtue of their dependency.

5. Regarding claim 35, the prior art fails to disclose or fairly suggest a system for optimizing dose delivery of radiation, including the computer processing means being arranged to determine an optimal set of weights of beamlets using the objective function, wherein the second term is zero only when the weights of beamlets mapped so as to pass through the at least one non-target volume are zero, in combination with all of the other limitations in the claim. Claims 36 and 37 are allowed by virtue of their dependency.

6. Regarding claim 38, the prior art fails to disclose or fairly suggest computer readable storage having stored thereon computer program instruction executable on a computer system for causing the computer system to perform a method including a system for optimizing dose delivery of radiation, including determining an optimal set of weights of beamlets using the objective function, wherein the second term is zero only when the weights of beamlets mapped so as to pass through the at least one non-target volume are zero, in combination with all of the other limitations in the claim.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
